SUMMARY

Lead Mobile Engineer with 7+ years shipping production mobile products at scale. Own mobile architecture, release governance, and delivery for a 4-engineer squad serving **5M+ users**. Expert in offline-first mobile architecture, modular system design, and scaling production apps to millions of users. Open-source contributor with **315+ GitHub stars** and packages adopted by **5,000+ developers**.

EXPERIENCE

Lead Mobile Engineer

Jul 2025 – Present

[iStoria](#) · Riyadh, Saudi Arabia (Hybrid)

Stack: Flutter, Dart, PowerSync, Drift, Firebase, Sentry, GitHub Actions, GraphQL, REST

- Led 4 mobile engineers, owning architecture decisions, release governance, and delivery timelines across iOS and Android.
- Reduced release cycle from 4 weeks to 1 week by implementing trunk-based development, feature flags, and automated CI/CD.
- Architected modular Flutter codebase with **48+ feature modules** and 137+ routes, establishing team-wide code quality standards.
- Drove cross-functional alignment with Product, Design, and QA to ship features on predictable cadences for **5M+ users**.

Senior Mobile Engineer

Jan 2022 – Jul 2025

[iStoria](#) · Riyadh, Saudi Arabia (Hybrid)

Stack: Flutter, Dart, PowerSync, Drift, Codemagic, Firebase, Sentry, Adjust, REST, GraphQL

- Achieved **99.9% crash-free rate** by profiling and resolving critical performance bottlenecks in production.
- Architected offline-first infrastructure using PowerSync and Drift, plus state management, caching, and networking layers.
- Maintained and adapted **8+ custom/forked Flutter packages** to meet product-specific requirements at scale.
- Maintained full-stack stability (mobile, backend, cloud) as **sole engineer for 1.5M users** during team transition.

Mobile Engineer

Oct 2020 – Jan 2022

[Happy Trip](#) · Cairo, Egypt

Stack: Flutter, Dart, REST, Firebase

- Owned mobile delivery end-to-end: task planning, code reviews, and sprint execution across the Flutter team.
- Architected a production-grade networking SDK with multi-layer caching, request queueing, auto-retry on reconnect, token refresh, and background JSON parsing, **cutting networking code by 60%**.
- Built the company's first mobile platform from scratch, enabling its transition from traditional tourism to a tech-enabled booking service.
- Shipped core flight/hotel booking app and internal HR and POS tools from zero to production.

Mobile Engineer (Part-time)

Feb 2021 – Oct 2021

[Tech Bay Portal](#) · UAE (Remote)

Stack: Flutter, Dart, Socket.io, Google Maps

- Shipped multiple core features for a ride-hailing platform — including real-time GPS tracking — within a large multinational agile team.
- Integrated Socket.io for live driver tracking and trip updates across the taxi platform.

Mobile Engineer

Aug 2019 – Sep 2020

[FekraSoft Co](#) · Cairo, Egypt

Stack: Flutter, Dart, RxDart, Firebase

- Led company-wide Flutter adoption, onboarding engineers from Java/native backgrounds and establishing cross-platform development standards.
- Mentored engineers on advanced Flutter patterns (Streams, RxDart, DI), accelerating team productivity.
- Shipped e-commerce and PDF apps with barcode scanning, file encryption, and secure downloads.
